PRESENTATION
**Objective:**

To build capacities and raise awareness of members of the Belize Open Government National Steering Committee on their role by exposing them to knowledge and experiences from around the world that have contributed to the implementation of successful open government steering committees.

**Rationale:**

The introduction of open government in any given adopting country since 2011 had inspired adjustments that enable its successful implementation by operating under certain standards. One of these adjustments addresses the generation of an in-country multi-stakeholder working group willing to orient the open government actions to be adopted. With the inception of the very first national open government steering committee in Belize in 2020, this project seeks to contribute in the preparation of those actors willing to participate of the steering committee by providing three basic training sessions on fundamentals of the role and expected actions; including the development of the national open government action plan. Upon successful completion of the training sessions, members of the Steering Committee will acquired the necessary proficiency to successfully undertake their roles. The sessions will be accompanied by the project’s coordinating team in Belize and will be delivered to the group in Belize by international experts in a videoconference format, overseen by the OAS and the Open Government Partnership (OGP).
